Looking for a Spring\Summer Job? Love to work *Outdoors*?

Description: Applicant will assist in field trials in Champaign/Urbana and throughout Illinois. You will have the opportunity to work on Field Crop Plant pathology research in corn, soybean and wheat. This position will give you **valuable research** and work experiences such as:

- Assisting in numerous experiments
- Experimental design and setup
- Collecting data
- Maintaining field plots
- Working in the lab

Requirements:

- 40 hours/week (+/-) in summer
- Ability to work outdoors
- Availability to travel throughout Illinois during summer
- Must have a valid driver's license
- Optional: 10-15 hrs per week during school

No previous experience is required. Position can start in the Spring to assist with lab preparation. Pay is competitive. Contact Keith Ames at email below for further information.
