

RADIOLOGIC TECHNOLOGY: COMPUTED TOMOGRAPHY

Health Career Admissions

Program Code: G.XCT.CER

Certificate Program

Graduation requirements — 12 semester hours

The Computed Tomography Certificate Program offers advanced training for radiologic technologists. Upon completion of the certificate, graduates will be prepared to take the national ARRT certification exam.

Program Notes

- This is a selective admissions program — applicants must be ARRT certified in Radiologic Technology. Contact Tammy Cox at tcox@parkland.edu for more information regarding admission, progression, and graduation.
- Clinical sites must be approved before enrolling in XCT 215. Clinical sites must be Joint Commission accredited and the clinical mentor must be an ARRT certified technologist in CT.
- XCT 212 and XCT 214 qualify for both CT and MRI certificates. Students taking those courses for the CT certificate who then pursue the MRI certificate within five years will not need to repeat the courses.
- Students are required to keep a 2.0 minimum GPA and a C or higher in all XCT courses.
- XCT 210, XCT 212, and XCT 214 are 8-week accelerated online courses.

Suggested Sequence

<i>SUMMER</i>	<i>FALL</i>	<i>SPRING</i>
<i>1st Semester</i>	<i>2nd Semester</i>	<i>3rd Semester</i>
XCT 215	XCT 210	XCT 212 (first 8 weeks)
		XCT 214 (second 8 weeks)

Required Program Courses Cr. Hrs.

XCT 210	Computed Tomography Imaging.....	3
XCT 212	Sectional Pathology.....	3
XCT 214	Patient Care.....	3
XCT 215	CT Clinical	3

Total Semester Credit Hours 12
